

Refinement: These items are too big

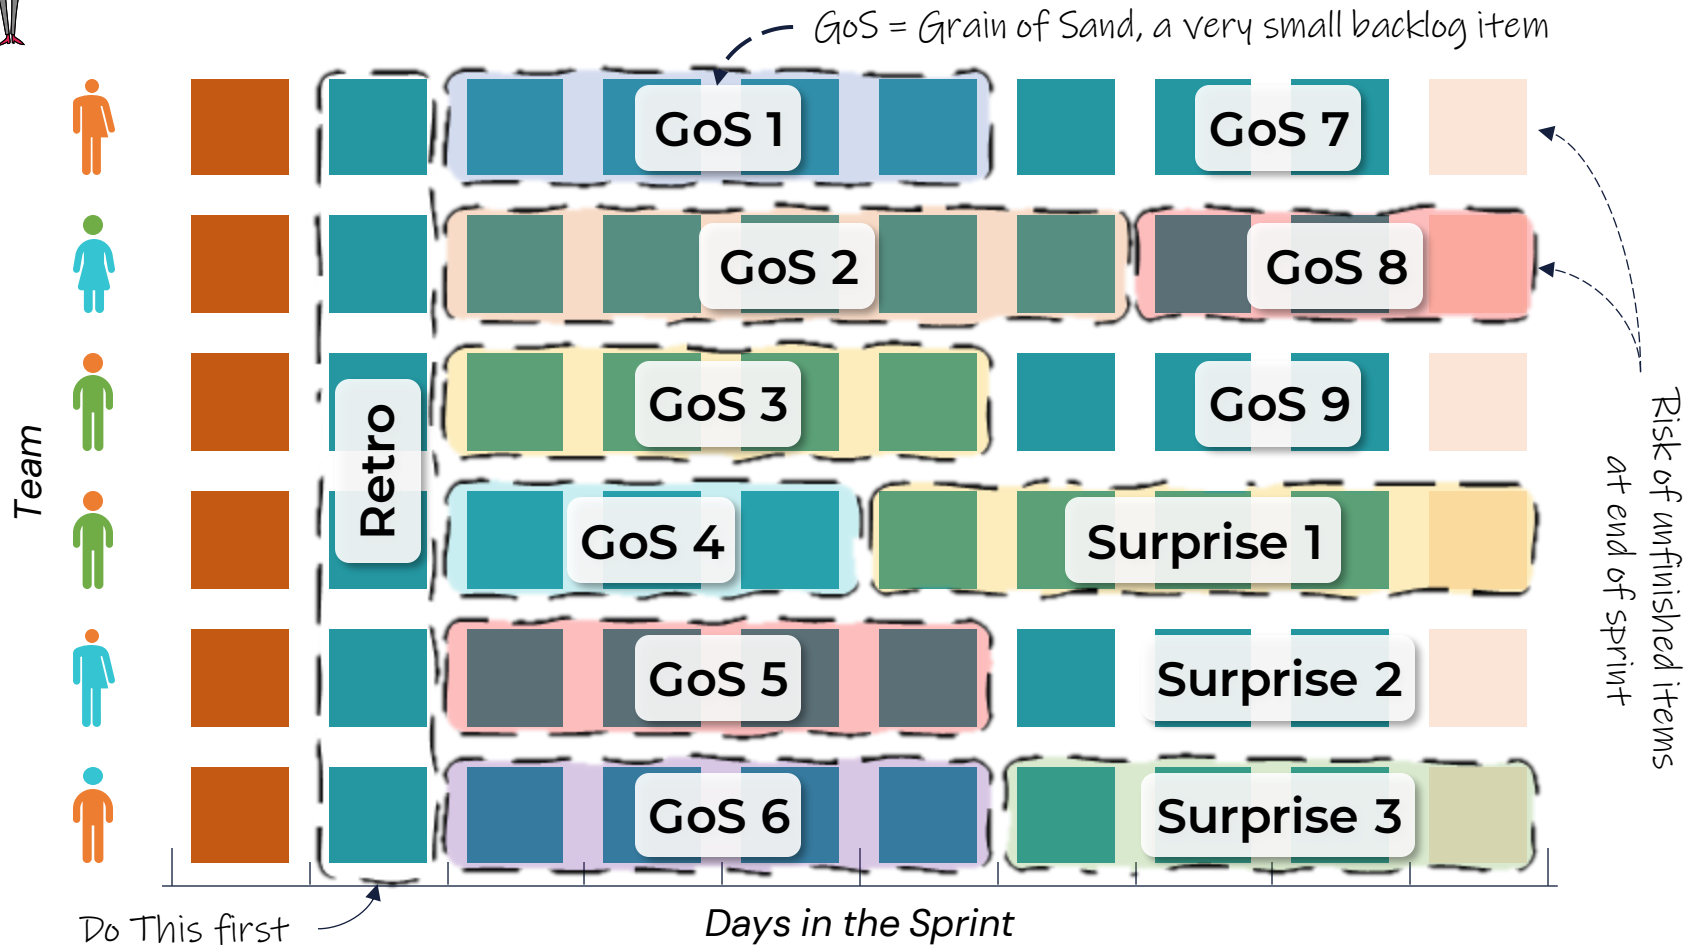

"This team cannot handle the unexpected without disrupting the Sprint.."

Refinement: How small is small enough?

Individualist Teams: If each team member can expect to complete two items during the sprint, the team has some flexibility to react to new requests..

Refinement: How small is small enough?

Pairing and Swarming: If two to three people can finish each item in two to three days, the team can react flexibly to new requests during the sprint.
